Re: REACH (EC) No. 1907/2006

The REACH Regulation (EC) 1907/2006) concerning the Registration, Evaluation, Authorization and Restriction of Chemicals, entered into force on 1 June 2007. It is critical that all suppliers in the chain meet their duties under REACH in timely manner in order to avoid supply chain disruption.

In addition, we are seeking information related to the potential presence of Substances of Very High Concern (SVHCs), which may be present above 0.1% in any of the components/products which we supply. This is a mandatory communication process for all components/products placed on the market within the European Union.

We hereby confirm that we have reviewed and are familiar with the current candidate list of SVHCs published by the European Chemicals Agency as such list has been updated as of the date hereof. We confirm that none of the components/ products that we Fuyuka supply to all customers worldwide contain any SVHCs identified on such list in an amount greater than the permissible level (i.e. above 0.1% by weight).

We further understand that the candidate list of SVHCs List will be updated on a regular basis by the European Chemicals Agency. We Fuyuka will continuously monitor this list and updates thereto. In the event that a new candidate is added to the list, we will in time determine our usage of such SVHC in all of the components/ products that we supply to customers and update them in writing of such results each time this occurs.

Should you have any questions or concerns regarding this declaration, please do not hesitate to contact us.

Yours faithfully

Fuyuka Electronics Limited
